Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE _____ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18, 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Schaefer (US 5 672 818).

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-18 and 22 are rejected under 35 U.S.C. 102(a) as being anticipated by Irihune (US 6 725 833).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19, 20, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Irihune (US 6 725 833). Irihune discloses a throttle device with a motor terminal connecting portion (71) extended from a cover (10) toward a motor (31) and an output gear (6) mounted between a throttle position sensor (9) and the motor terminal connecting portion (col. 3, lines 25-40, col. 4,

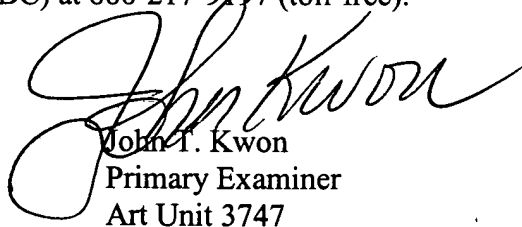

Art Unit: 3747

lines 35-49, col. 8, lines 53-63). The differences between the prior art reference and the instant invention are the use of a specific material and shape of the gear and the provision of the metal plate. It would have been considered to be an obvious choice of mechanical design because one skilled in this art is familiar with basic metallurgy and normally has the laboratory test facilities. To optimize or select the suitable material and shape of the gear and the provision of the metal plate would be within the ability of ordinary skilled in this art.
